

The Physics of Fullerene-Based and Fullerene-Related Materials

Filesize: 3.04 MB

Reviews

Definitely one of the best ebook We have possibly go through. It usually does not charge a lot of. I am just pleased to inform you that this is actually the greatest ebook i have got study in my own lifestyle and may be he greatest publication for actually.

(Ms. Patsy D'Amore III)

THE PHYSICS OF FULLERENE-BASED AND FULLERENE-RELATED MATERIALS

DOWNLOAD

Book Condition: New. Publisher/Verlag: Springer Netherlands | Krätschmer and Huffman's revolutionary discovery of a new solid phase of carbon, solid C₆₀, in 1990 opened the way to an entire new class of materials with physical properties so diverse that their richness has not yet been fully exploited. Moreover, as a by-product of fullerene research, carbon nanotubes were later identified, from which novel nanostructures originated that are currently fascinating materials scientists worldwide. Rivers of words have been written on both fullerenes and nanotubes, in the form of journal articles, conference proceedings and books. The present book offers, in a concise and self-contained manner, the basics of the science of these materials as well as detailed information on those aspects that have so far been better explored. Structural, electronic and dynamical properties are described as obtained from various measurements and state-of-the-art calculations. Their interrelation emerges as well as their possible dependence on, for example, preparation conditions or methods of investigation. By presenting and comparing data from different sources, experiment and theory, this book helps the reader to rapidly master the basic knowledge, to grasp important issues and critically discuss them. Ultimately, it aims to inspire him or her to find novel ways to approach still open questions. As such, this book is addressed to new researchers in the field as well as experts. | Preface by the Editor. Preface by Sir Harold Kroto. 1. Production of Fullerenes; W. Krätschmer. 2. Intercalation Compounds of Fullerenes I: Synthesis, Characterization, and Solid State Properties; T. Yildirim, O. Zhou, J.E. Fischer. 3. Intercalation Compounds of Fullerenes II: Structure and Superconductivity of Alkali Metal Fullerides; T. Yildirim, O. Zhou, J.E. Fischer. 4. Experimental Studies of the Electronic Structure of Fullerenes; M. Knupfer, T. Pichler, M.S. Golden, J. Fink. 5. Polymer and Dimer Phases in Doped Fullerenes; K....
