Taylor Francis Ltd, United Kingdom, 2015. Hardback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book. The concept of identity is one of the most important ideas the social sciences have investigated in recent years, yet no introductory textbooks are available to those who want to gain a sense of this burgeoning field. The first of its kind, this text provides an introduction to the scientific study of identity formation, with a focus on youth development. The analyses of the problems and prospects faced by contemporary young people in forming identities are placed in the context of societies that themselves are in transition, further complicating identity formation and the interrelated processes of self development and moral-ethical reasoning. In order to sort through what is now a vast literature on the various aspects of human identity, this book introduces the Simplified Identity Formation Theory. This theory cuts through much of the academic jargon that limits the accessibility of this promising field, and builds an understanding of human identity from first principles. This book is optimized for students and instructors, featuring several useful pedagogical tools and a robust series of online resources: Primer format: the text synthesizes the vast and disparate literature that has characterized the field of Identity Studies, with a focus on identity formation during the transition to adulthood; theory and research is discussed in plain, non-technical language, using the author's new Simplified Identity Formation Theory. In-text pedagogy: to enhance student engagement, box insert and in-text examples from current events, popular culture, and social media are incorporated throughout the text; key terms are in bold in each chapter and combined in a glossary at the end of the text. Online resources for instructors: A robust set of resources that, when combined with the text, provides...
